Company History and Overview

- In August 2002 a subsidiary was officially opened at Frankfurt-Hahn Airport. The subsidiary handles import and export.
- Afterwards Trans Sib expands by buying three vehicles of its own and began carrying out their first tours to Frankfurt, Nuremberg and Munich themselves. Since then the company has been growing constantly, expanding its motor pool and routes.
- Currently the Trans Sib motor pool consists of 25 semi cabs and a small transporter. The staff has also grown from 5 to 41. Specialized software has been developed and implemented enabling online tracking of freight transport.
- Trans Sib has acquired the officially certified status of a Regulated Agent (DE/RA/00893-01/0416) and has become a member of TAPA (Transport Asset Protection Association).

Trucking to destinations within Europe ex HHN

DST	City	Country	Distance, km	Transit time, h*
AMS	AMSTERDAM	NETHERLAND	431	6
BRU	BRUSSELS	BELGIUM	289	5
BUD	BUDAPEST	HUNGARY	1097	20
CPH	COPENHAGEN	DENMARK	926	15
LUX	LUXEMBOURG	LUXEMBOURG	104	1.5

*) Transit time and frequency depend on cargo volume. Transit time is for Ready-to-Go cargo and does not include handling/(un)loading/customs time at the warehouse

Main Services

On time and secure delivery of:

- Air-freight to all major airports throughout Europe as well as direct delivery service upon request
- Perishable goods, pharmaceuticals, equipment, flowers and plants using temperature controlled vehicles
- Heavy, bulky and oversized shipments
- Dangerous goods
- BUP
- General and consolidated goods using daily scheduled flexible FTL and LTL services

Additional Services

- Handling and storage based on well-formed partner relationship with handling warehouses all over most of Europe
- Interim and long term storage of goods
- Express Service
- Delivery of goods on Sundays and public holidays
- Around the clock information service
- On-going tracking system of goods movement throughout the entire transportation route
- Electronic handling and storage of all data, including AWBs and PODs

Fleet

- Our fleet of environmental-friendly vehicles are available with mega trailers and cooler units all equipped with roller-beds, GPS navigation, security locking systems and mobile networking.
- We assure quick and easy load or unload from a variety of ULDs, both cargo pallets and containers, from standard size to Q7. Specialized trailers with slide and adjustable roof and sides satisfy the need for out-of gauge shipments or alternative loading processes from the top or sides.

Fleet

Tractor Units:

- Mercedes-Benz Actros
 - Reliable safety and assistant systems
 - Benchmarked for fuel and CO2 level

Length	5.8 m
Width	2.5 m
Height	3 m
Own weight	7 t
Permissible total weight	40 t

Fleet

Mega Trailer Units:

- Low self weight of 8.2 t enables more transport capacity
- 24 ton payload concurrent with 100 m³ load volume are major key points in solving diverse transportation assignments
- Roller Bed System

Inner: Length	13.68 m
Width	2.45 m
Height	3 m
Outer: Length	13.95 m
Width	2.55 m
Height	4 m
Max. Volume	100 m ³

Fleet

Mega Refrigerated Trailer Units:

- Own Weight 10.8 t
- Adjustable temperature between +27°C and -29°C
- High grade insulation
- Load volume 99 m³
- Roller Bed System

Inner: Length	13.35 m
Width	2.48 m
Height	3 m
Outer: Length	14.00 m
Width	2.60 m
Height	4 m
Max. Volume	99 m ³

Fleet

Roller Bed System:

- Roller Bed Systems serves for easy loading or unloading of Air Freight Pallets
- Pallets can effortlessly be maneuvered over load platform

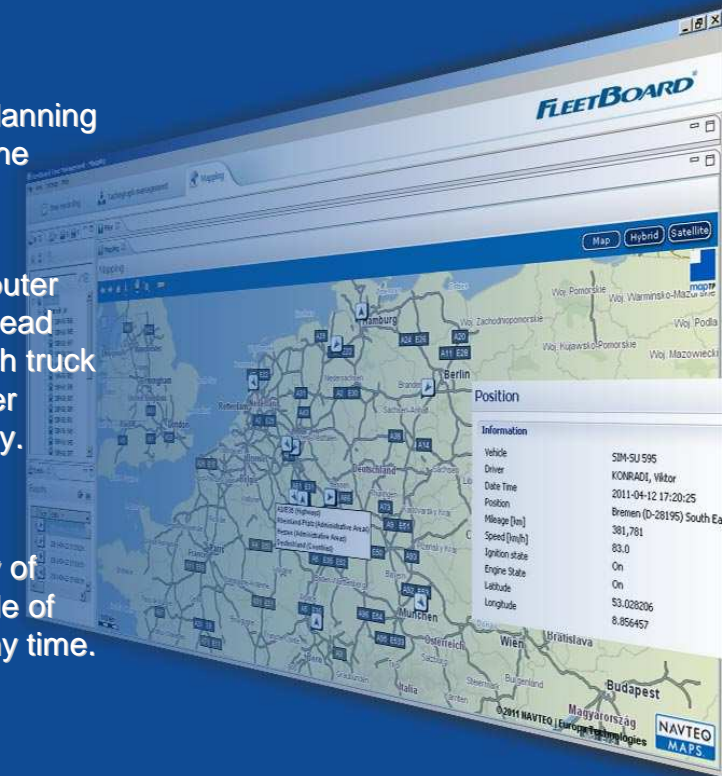

Advantages

- Experienced staff and profound knowledge both in aviation and road transportation markets
- Cost-effective top logistic service of high quality
- Best solutions for cargo road transportation
- Professional attitudes, creativity, care, respect and attention to our esteemed clients and partners
- Extensive training for drivers and planning staff in Vehicle, Time and Logistics Management

Advanced IT

- Usage of modern and effective logistics solutions in transportation planning enables our staff to enter external orders for carriage and work out the most efficient plan for the delivery of goods.
- Every vehicle in Trans Sib's fleet is equipped with an on board computer that enables us to exchange information between vehicles and the head office. Our staff is well informed of current position and status of each truck at all times. The ability to communicate with drivers in real-time, enter orders and plan trips offer you, our valued Customers, great reliability.
- Our clients can easily track & trace consignments through an online tracking facility by simply entering their full AWB number. Availability of real-time status updates on your shipment throughout the full lifecycle of your shipment - So, you can see exactly where your goods are at any time. Customer support and service is our highest priority.

Partners
